WORK EXPERIENCE

Embbeded Systems Engineer - 2nd line

Eneida.io

16th Feb 2025 - Present Coimbra/Lisbon, Portugal

- Provide 2nd-level support for devices deplyoed in the field, investigating complex hardware and software issues.
- Perform debugging, troubleshooting and root cause analysis of embedded systems and firmware.
- Design and implement embedded firmware for smart sensor devices.
- Collaborate with customer success 1st tier to understand the customer technical requirements and provide tailored embedded solutions.
- Monitor sensor performance remotely and troubleshoot hardware/software issues to maximize uptime.
- Liaise between engineering and customer success teams to ensure product improvements align with client needs.
- Deliver training sessions and create technical documentation for customers and internal teams.

Technologies: C/C++, Python, PIC32, i.mx8mm, Git, IoT, Scrum.

Customer Success Engineer

Eneida.io

20th Feb 2023 – 16th Feb 2025 Coimbra, Portugal, Remote

- Monitored the performance of smart sensors devices deployed in the field.
- Investigated field issues and collaborated closely with Engineering and Product Development teams to identify root causes and implement improvements.
- Collected and analyzed customer feedback to identify product improvements and new features.
- Provided onboarding and technical training sessions for customers.
- Developed and maintained technical documentation covering product functionality, troubleshooting and operational procedures and created a comprehensive knowledge base that substantially reduced recurring support requests.
- Acted as a technical bridge between Customer Success, Engineering, Product and Sales teams.

Tools: Jira, Zendesk, Coda, Power BI

Full-stack Developer

Instituto Superior Tecnico, Physics Department

Oct 2021 – Fev 2022 Hybrid

- Development a web platform for remote laboraty experiments.
- Developed backend functionality using Python and Django framework.
- Developed frontend components using JavaScript and Jinja.
- Implemented real-time data visualization using Plotly.
- Integrated software components with remote experimental equipment. website.

EDUCATION

Master's degree in Engineering Physics

Instituto Superior Tecnico

Set 2019 – Oct 2022 Lisbon, Alameda

Grade - 16/20 | Major: Interdisciplinary Physics/Energy

Bachelor's degree in Engineering Physics

Instituto Superior Tecnico

Set 2016 – Jul 2019 Lisbon, Alameda

Carlos Alberto Gonçalves High School

Cape Vert

Set 2010 – Jun 2016 Cabo Verde

STRENGTHS & SKILLS

Technical Documentation
Embedded Firmware Development
Root cause analysis
Embedded Linux
Debbuging and Testing
PIC32 / STM32 / ESP32
Device Diagnostics
Agile / Scrum

Agile development
C/C++
Git
Python
Power BI
Excel
word
Power Point
